RETAIL SHIPPING ANALYSIS

# Shipping is more than a delivery step

It is a growth lever hiding inside the sales data.

Made with GAMMA

THE BUSINESS QUESTION

# The analysis asks where revenue and service levels meet

Three questions turn a dashboard into a decision tool.

## 01 Value creation

Which customers, regions, products, and shipping modes create the most value?

## 02 Service tradeoffs

Where does delivery speed differ from revenue contribution?

## 03 Actionability

What actions can improve growth, service, and planning at the same time?

METHOD · DATA FOUNDATION

# The project connects 9,800 retail records to operational decisions

Dataset covers orders, shipping, customers, geography, products, and sales across 18 reported features.

**11**

missing postal-code values

**0**

duplicate rows

**Order → ship**

shipping duration engineered from dates

COMMERCIAL SIGNALS

# Revenue is concentrated in a few clear commercial signals

Customer segment

Category

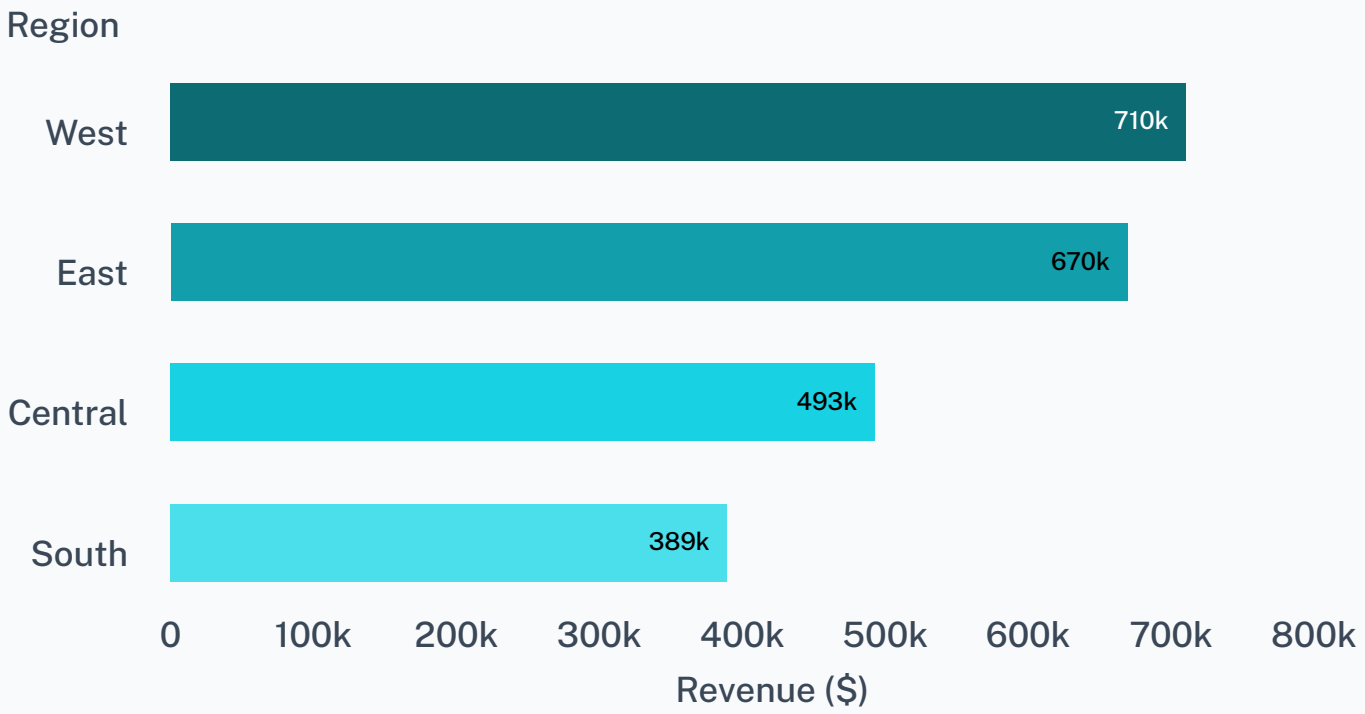

Consumer leads segments; Technology leads categories. Phones and Chairs are the top sub-categories at $327,782.49 and $322,822.75.

Made with GAMMA

REGIONAL SIGNAL

# West is the strongest regional growth anchor

DECISION IMPLICATION

## West

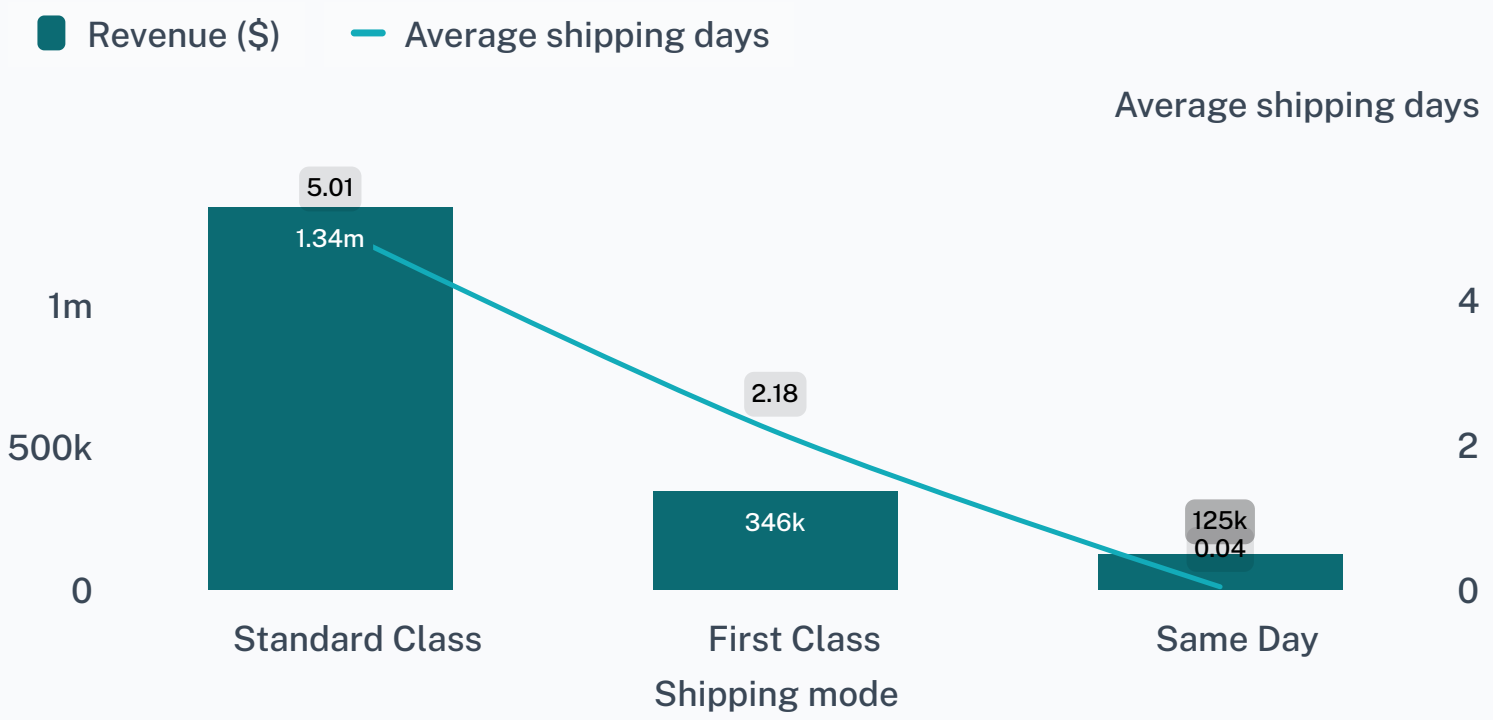

Use the gap as a prompt for two questions:

- What is working in the West?
- What is blocking the South?

Made with GAMMA

SERVICE ECONOMICS

# Shipping mode reveals a value-versus-speed tradeoff

THE TRADEOFF

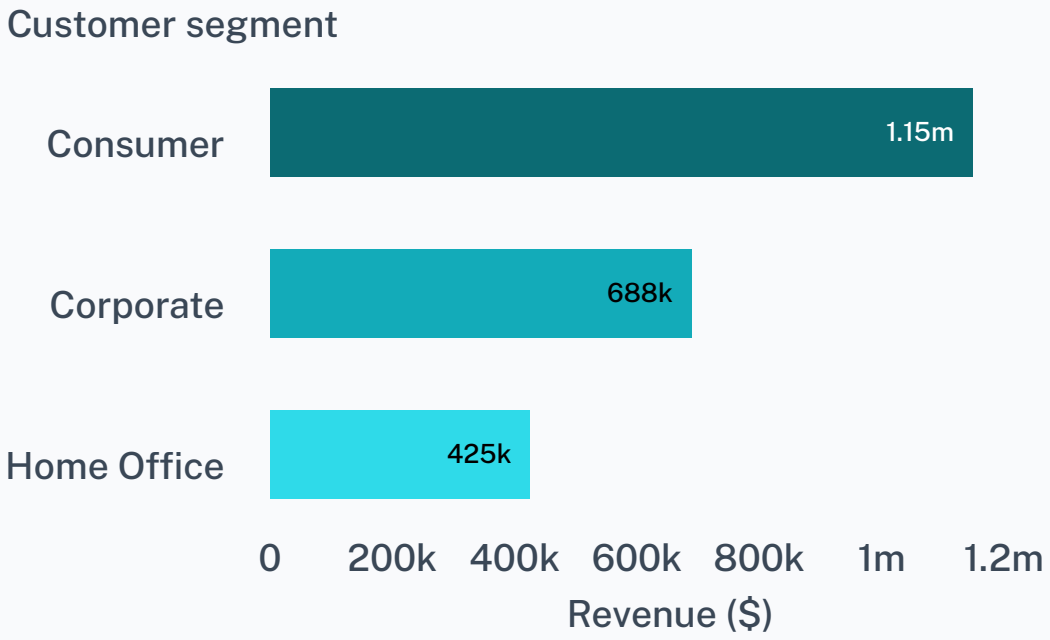

## Faster is not the decision.

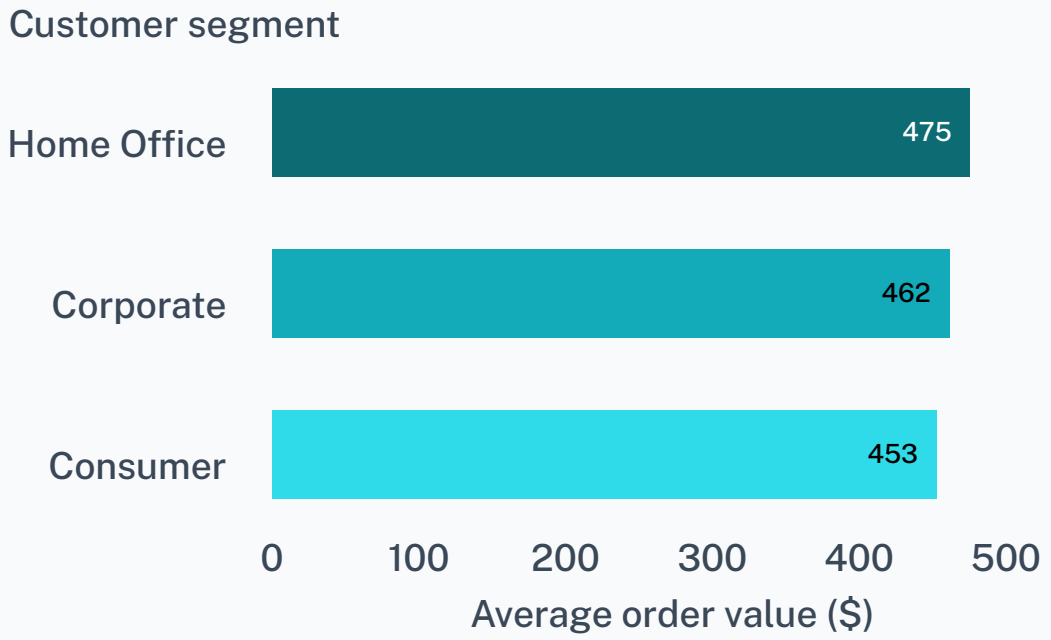

The decision is matching service level to customer and order value.

Made with GAMMA

CUSTOMER MIX

# Customer mix creates two different growth plays

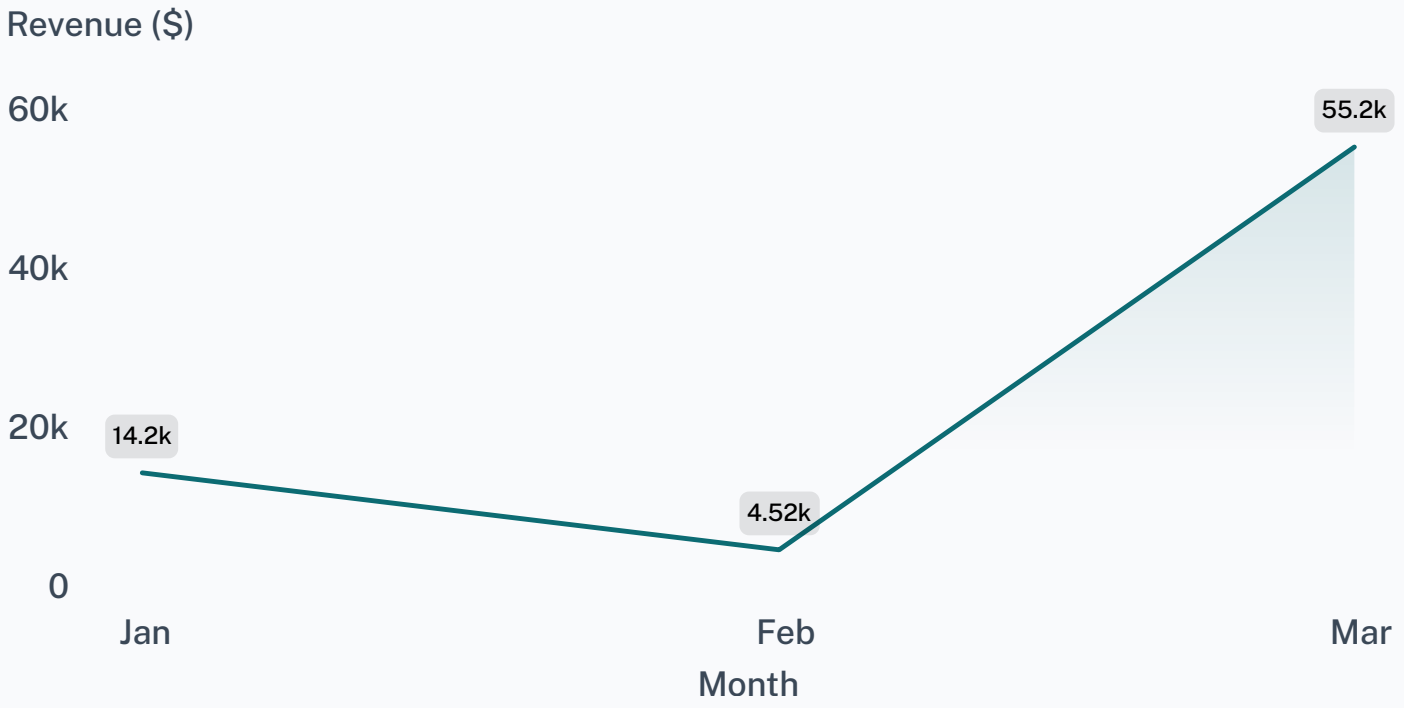

Consumer is the scale engine. Home Office and Corporate are the higher-value retention opportunity.

Made with GAMMA

PLANNING SIGNAL

# Monthly revenue turns the dashboard into a planning tool

FROM REPORTING TO PLANNING

## Keep the full trend interactive.

Pair demand patterns with inventory planning, staffing, and shipping capacity.

Made with GAMMA

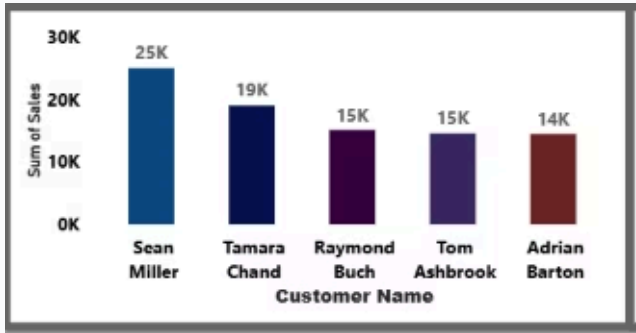

DECISION INTERFACE

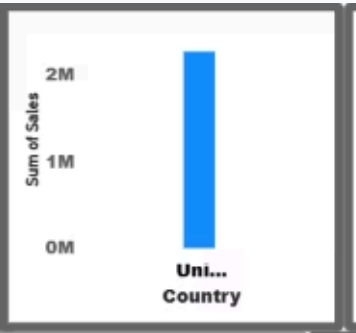

# Power BI makes the tradeoffs visible in one place

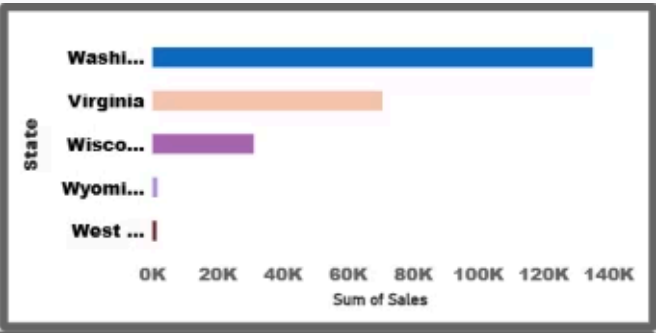

Interactive views connect region, ship mode, segment, sub-category, state, customer, product, and delivery-time questions.

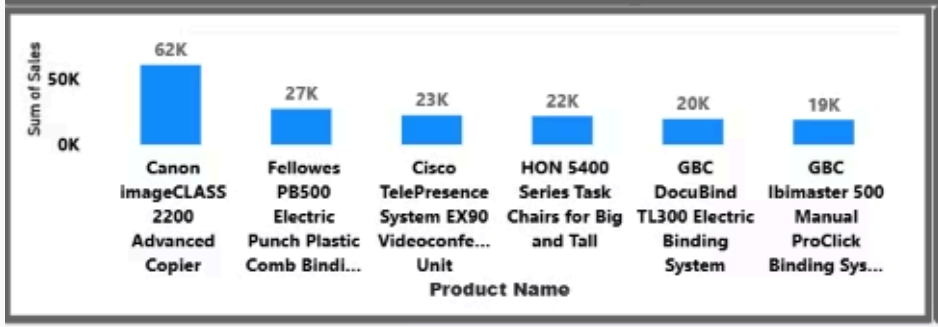

One view links commercial performance to operational service levels.

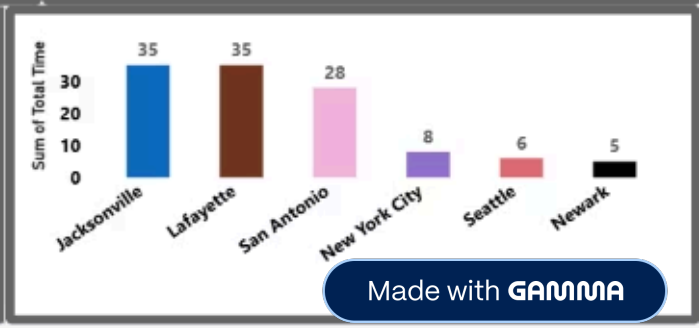

Made with GAMMA

FROM ANALYSIS TO ACTION

# Three actions turn the analysis into a growth agenda

01

### Protect the core

Keep Standard Class efficient while monitoring its five-day service profile.

02

### Target the upside

Scale Technology, Phones, Chairs, the West, and high-value customer segments.

03

### Close the gaps

Investigate lower-revenue regions, delivery delays, and demand volatility.

Use the dashboard as a recurring operating view, not a one-time report.
